EXPERIENCE

HIGHLIGHTED PERSONAL PROJECTS

Front End Developer

September 2022 – Present

[Meal app](#) – This collaborative web application showcases a collection of your favorite meals. Explore detailed information about each meal and engage with the community through comments and likes. The server stores all comments, allowing you to discover new culinary experiences and share your thoughts with fellow users.

- Collaborated with a team of 2 developers to create a web application showcasing favorite meals.
- Developed comment section and popup menu functionalities.
- Implemented comprehensive testing strategies.
- Utilized HTML, CSS, JavaScript, Webpack, Jest, and Redux.

[Duolingo-dashboard](#) – Track your language learning progress daily, compete with others, and stay motivated with the user-friendly Duolingo Dashboard. Seamlessly integrated with Duolingo. Join the community on Telegram: @duo_iq_bot.

- Volunteered as the front-end developer for the Duolingo Dashboard project, focused on tracking language learning progress, fostering competition, and motivating users.
- Collaborated with a team of a designer, a back-end developer, and a project manager to ensure the successful integration of features and a seamless user experience.
- Developed the interactive and user-friendly interface of the Duolingo Dashboard using Next js, and Tailwindcss.
- Seamlessly integrated the Dashboard with Duolingo, enabling users to easily track their progress, compete with others, and stay motivated in their language learning journey.

Highlight Digital Logic Projects

January 2024 – June 2024

Front-end developer (Vuejs)

Certificates Generator - a dashboard for generating groups of certificates and downloading them as a PDF or print them

Also adding different templates for the certificates.

- Generate new certificates by uploading an Excel file or adding the names one by one and choosing the template for these certificates.
- The super admin can create more templates
- The super admin can create other admins and keep track of their history.

Tashgeel Platform - Tagheel Platform is a comprehensive employment and networking platform that connects job seekers and companies.

- **Multi-User Functionality:** Job Seekers can create/manage profiles, add education, certificates, and expenses, create posts, search for jobs/companies/blogs, and build/download CVs; Companies can create posts/jobs, accept/reject candidates, search blogs/job seekers; Super Admin manages overall operations.
